

## ONLINE SAFETY: 3 TIPS FOR PARENTS

## **BE AWARE**

It's important to understand about extremist groups and ideologies so that you can be aware of how they attract new members. By educating yourself about the risks to young people, you are better equipped to keep them safe.

## **TALK ABOUT IT**

Try to have open conversations with young people about how they use the internet. Ask them about their favourite sites and create a positive atmosphere around the use of the internet so that they are less likely to keep things secret from you.

## **TAKE ACTION**

Though its important to trust young people, it's also important to protect them. If someone is showing signs that they have been accessing extremist content online, you should discuss this with them and monitor their online activity.
